## DETAILED ACTION

### *Drawings*

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: **Reference number 28 is not in the specification.** Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### *Specification*

2. The disclosure is objected to because of the following informalities:

On page 1, line 1 the cross-reference to related art should be placed after the Title. See MPEP 608.01(a). Also in the cross reference to related art, after "10/160,273" insert --, now US Patent No. 6,746,105--, and after "June 4, 2002" insert --.--.

On page 8, line 8 replace "contact layers 22" with --contact layers 20--.

Appropriate correction is required.

***Claim Objections***

3. Claim 5 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 5 does not further limit claim 4 from which it depend, in that, claim 4 already recites "wherein the active anchor is a thermal actuator.....".

***Allowable Subject Matter***

4. Claims 1-15 will be allowed after correction as identified in the "Specification", "Drawing" and "Claim Objection" sections are made.
5. The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not disclose, teach or render obvious the invention of reducing the surface area required for each nozzle arrangement, which would allow increased nozzle arrangement density on a printhead.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior of Silverbrook (US 6,536,874 B1) discloses the invention of reducing the surface area, however, Silverbrook can not be used under 35 U.S.C. 201(e), because it is the same inventor as the applicant.
